

## Energy saving with Octopus Energi AB

### Pig farm in Radbjerg, Falster Denmark

Pig farmer Hans-Jørgen and his son Henrik Larsen decided to install Octopus heat pump the Ice-Stick when they would build their new farm. They decided that burning of oil was not economical or environmentally friendly.

Since January 2007 when the building was constructed only a few refinements were made to integrate the entire heating system. Today there are 1800 piglets heated by the Ice-Stick.

#### FACTS:

- The building was constructed in January 2007
- Heated area is 1800 m<sup>2</sup>
- 3pcs IS 81XP from Octopus is heating
- Heat distribution is made with floor heating
- The temperature demand is 25 degrees Celsius
- 2007 the annual consumption was 27000 kWh, no supplementary heating was used that year

Satisfied piglet farmer Hans-Jørgen Larsen
